

Elia Franzella — Software Developer

 blackpastures |  elia-franzella |  franzella.dev |  franzella.elia@gmail.com |  +39 3273469715 |  Palermo, Italy

SUMMARY / OBJECTIVE

Software developer with 5 years of experience designing and implementing scalable, cloud-native and event-driven backend systems. I have collaborated closely with product managers, designers and DevOps teams in large, product-focused organizations, working within Agile/Scrum cycles and rapid integration and delivery workflows. I am now seeking a role where I can leverage my full-stack development skills in challenging and innovative projects.

PROFESSIONAL EXPERIENCE

Backend Developer – GIGLIO.COM S.p.A.

Jan 2022 / Jan 2026 – Palermo, Italy

- Redesigned the e-commerce catalog ranking system from scratch, incorporating asynchronous and incremental updates with BullMQ and MongoDB, cutting rank synchronization times by 90% in the worst-case scenarios.
- Developed a cross-platform routing and origin-tracking server, allowing the launch of the e-commerce mobile app and the centralization of web resources.
- Integrated Atlas Search's semantic search into the e-commerce platform, boosting search performance by 15% and improving both user experience and results availability.
- Optimized several APIs using advanced caching patterns backed by Redis, reducing retrieval times by 70% on average while retaining data freshness.
- Rescued – and extended with custom Bash scripts – a legacy Linux CUPS printing system, using Nmap and ARP utilities to inspect and audit networks.

Proficiencies: **TypeScript, JavaScript, NestJS, MySQL, MongoDB, Redis, GraphQL, REST, gRPC, GNU/Linux, Docker, Git.**

Junior Backend Developer – Manpower S.r.l.

Mar 2021 / Jan 2022 – Palermo, Italy

Development of modern, technical backend solutions within the microservice-based software ecosystems of clients.

SKILLS

Languages:	TypeScript/JavaScript (Node.js), Rust , Python , C/C++ , Bash , HTML5 , CSS3
Frameworks, libraries:	NestJS (microservices), React , Next.js , Qwik , TailwindCSS , Jest (unit, end-to-end testing)
Infrastructure:	Docker , GNU/Linux , RabbitMQ , BullMQ
Databases:	MySQL , PostgreSQL , MongoDB , Redis
API design:	REST , gRPC , GraphQL , SOAP
Methodologies:	Agile , Scrum , CI/CD
Version control:	Git

Analytical quick thinking: Ability to promptly identify incident culprits and provide mitigation and fulfilling solutions.

Autonomy and self-learning: Mastery of new technologies through self-initiative to solve real problems.

Time management: Efficient task dispatching and priority self-management without in-team deadlocks.

Adaptability: Flexibility and managing change in fast-paced, dynamic and high-demanding environments.

PROJECTS

stateofneptune.com

[Link to Demo](#)

State Of Neptune's official band website. Single page application built with the Qwik framework and styled using TailwindCSS.

Alea

[Link to Code](#)

Utility library to work with most known probability distributions. Features pseudo-random number generator (PRNG) implementations, high-level APIs for repeatable random sampling and cumulative distribution functions (CDF) computing.

Talgene

[Link to Code](#)

Abstraction layer over genetic algorithm implementations featuring auto-iterations over generation advances and built-in genetic cross functions.

EDUCATION

(discontinued) Physics Bachelor's Degree at **University of Palermo**
High School Diploma at **Scientific high school B. Croce**

Palermo, Italy

Palermo, Italy

LANGUAGES

Upper Intermediate English (B2)

Academic Language Center - University of Palermo

Italian Native Speaker (C1)
